

"In high-growth companies to 'nail it' often means to create a working prototype others can believe in. At Tanner, each professional is their own successful prototype on a path to eventual mastery."

—Kent Bowman, Partner

"We look for people who will prove themselves on a smaller scale so they can be promoted to larger opportunities."

—Ray Ellison, Partner

"Many of us came from national firms. We brought the best parts from that experience to enhance the way forward. For me, it's all about engaging in meaningful work in a fun environment with people you care about."

—Todd McKinnon, Partner

"A core reason for Tanner's continuing success and growth is that each individual provides our clients with his/her own unique promise of value."

—Mark Erickson, Partner

"Creating the right culture is a big part of growing a successful practice. We don't take ourselves too seriously and try to have a sense of humor."

—Doug Hansen, Partner

"Our firm offers graduates a unique opportunity to prove themselves and achieve phenomenal success. It is no secret that our clients are impressive. Because of our one-of-a-kind culture and local roots we are able to recognize and reward talent in ways that appear to be unmatched in our market."

—David Sperry, Partner
